

Greenex energy Indonesia

When will greenex data center open in Indonesia?

In Q1 2023, the construction of another data center (still in Jakarta, too) will begin. With an initial capacity of 12 MW, Greenex Data Center will start operating in early 2024. This phenomenon occurs because of the extensive digital penetration in Indonesia.

Who is greenex energy?

Greenex Energy is an emerging leader in base oils and petrochemical products trade, distributing them to serve the markets in Africa, Europe, Asia and the Americas. The company stands for high-quality commodities.

Why did greenexdc set up a data center in Jakarta?

Jakarta's strategic position as a digital technology hub in Indonesia made us choose this location to set up a data center. GreenexDC has six strategic locations in Jakarta, and we will build a green data center at each of these locations to meet the increasing needs of data centers in Indonesia.

Will greenex DC deliver a greener and smarter data center?

Greenex DC promises to deliver a greener, smarter, and faster data center to fulfill Indonesia's ever-growing market. Indonesia is the largest country in Southeast Asia with a total population of 275 million, however, our data center capacity per capita is still one of the lowest (<1 watt/capita) in the world.

What is Indonesia's Green Data Center Market?

Indonesia's green data center market does not only come from local users but also from other countries. Like multinational companies that need cheaper disaster recovery center services, they fulfill collocations in multi-tenant data centers in Indonesia. Currently, most data centers in Indonesia are in Jakarta, then in Bekasi and Bandung.

What is greenexdc?

The goal is for companies that use data centers worldwide to rely on us for collocation servers. With a total of 6 green data center locations in Jakarta, GreenexDC can provide hundreds of megawatts of data center capacity for data center users around the world.
