

Guernsey uapow power station

What is Guernsey power station (GPS)?

The Guernsey Power Station (GPS) is a 1,875 megawatt, natural gas fired energy generation facility that will produce electricity equivalent to the power needs of approximately one million homes. GPS will be located in southern Guernsey County in Southeastern Ohio, in the heart of the state's Utica and Marcellus shale gas development area.

Where will Guernsey power station be built?

The Guernsey power station will be built on a 118-acre site in the Valley Township of Guernsey County, near the Utica and Marcellus shale gas development area of Ohio. The Guernsey power station will comprise three single-shaft combined-cycle generating units housed in three separate turbine buildings.

Where is the Guernsey power station in Ohio?

The Guernsey Power Station is located at 11160 Seneca Lane, Byesville, OH 43723.

How many jobs will Guernsey power station create?

It is expected to create up to 500 construction jobs and up to 25 permanent jobs during operations. The Guernsey power station will be built on a 118-acre site in the Valley Township of Guernsey County, near the Utica and Marcellus shale gas development area of Ohio.

How do I contact Guernsey power station?

General Contact: Guernsey Power Station LLC. c/o Caithness Services LLC. 565 Fifth Avenue, 29th Floor. New York, NY 10017. Office: 212-921-9099. Fax: 212-921-9239.

Will Guernsey power station be evacuated?

The electricity generated by the Guernsey power station will be evacuated to the Pennsylvania-New Jersey-Maryland (PJM) Interconnection grid, through interconnection with the existing American Electric Power (AEP) 765kV Kammer-Vassell transmission circuit, which runs through the project site.
