

This NextEra history unveils the pivotal moments that shaped the NextEra Company, from its early days to its current position as the world's largest generator of renewable energy from wind and solar. Understanding the ...

India is the world's third-largest emitter of carbon dioxide, with its energy supply heavily dependent on fossil fuels. Over the past decade, India has made significant progress and ...

Solar cells have revolutionized how the world harnesses energy. These devices convert sunlight into electricity, offering a clean and sustainable alternative to traditional power sources. Their ...

In 1883, Charles Fritts created the first solar cell using selenium wafers coated with a thin layer of gold. This invention marked a pivotal moment in the history of solar energy. Although Fritts' ...

The history of electricity spans over 2,600 years, from ancient Greek observations of static electricity to modern renewable energy systems. This comprehensive timeline reveals how ...

Hydropower, or hydroelectric power, is a renewable energy source that uses the natural flow of moving water to generate electricity. It has been used since ancient times for grinding flour and performing other tasks.

Alternative energies include renewable sources --such as solar, tidal, wind, biofuel, hydroelectric, and geothermal --and nonrenewable nuclear power (considered alternative but not renewable because it relies on uranium, ...

- ALLETE offers a 4.37% dividend yield and a 10-year DPS growth of 41%, supported by a 2.0 earnings cover despite an 89.7% payout ratio. - The company's EnergyForward plan targets ...

Utilities may speed renewable projects under new tax credit timeline: Jefferies Utilities "with renewables-heavy plans" may accelerate wind and solar projects by several years in order to ...

Energy group Hidroelectrica has signed the contract for its first floating photovoltaic project, Nufarul, marking a major step in Romania's renewable energy development. The signing took ...

The Big Beautiful Bill has created ripples throughout the renewable energy sector by terminating existing federal tax credits for residential solar projects effective December 31st of this year.

In a big step towards realising India's clean energy ambitions, Navratna company NLC India (NLCIL) is planning to launch IPO of its renewable energy subsidiary NLC India Renewables (NIRL) in FY 2026-27 and

History of renewable energy timeline

raise INR 4,000 crore to ...

A pivotal moment in the Xcel Energy history was the 1995 merger of Northern States Power with New Century Energies. This merger, followed by the rebranding as Xcel Energy in 2000, significantly broadened its geographic ...

Thomas Edison and Nikola Tesla advanced electric power systems in the late 1800s. Just have a couple of quick questions? Jump to our quick FAQs. When was electricity invented? Who discovered electricity? How was ...

The integration of 2-Methylpentane into renewable energy systems presents several technical challenges that researchers and engineers must address. One of the primary obstacles is the ...

This exploration of Peabody Energy's brief history will uncover the company's journey, from its founding by Francis S. Peabody to its current position as a leading global pure-play coal company. We'll delve into the company's ...

Uzbekistan is set to bolster its renewable energy capacity with the launch of a 191.6 MW solar power plant by mid-2025, as part of its ambitious goal to achieve 25% renewable energy in its ...

"The Solar Film," a short film produced by Robert Redford and directed by Elaine and Saul Bass, is a fascinating piece of cinematic history. Released in 1980, it blends animation, live-action footage, and a documentary style to advocate for ...

Europe is complicated and even journalists from EU member states sometimes struggle to understand how climate and energy policy is made, and when institutions take key decisions. This timeline flags key European energy ...

It's said that the concept of sustainability began during the industrial revolution. And it's true that CO₂ and greenhouse gas emissions were far lower before that era. CO₂ emissions over time, by region: 1750-2023. Source: Our ...

Humans have been harnessing renewable energy for millennia, beginning with the discovery of fire over a million years ago, which is regarded as bioenergy today. Historical records indicate that early civilizations innovatively exploited ...
