Does Honduras have a reliable electricity supply network?

While Honduras has made progress in expanding access to electricity and diversifying its energy mix, challenges in the electricity supply network persist. Issues such as high reliance on imported fossil fuels, inadequate infrastructure, and financial constraints have led to reliability challenges.

Does the Inter-American Development Bank support energy projects in Honduras?

Currently, the Inter-American Development Bank is contributing funds and assistance to the following projects in the energy sector in Honduras: An Energy Sector Support Loan supported through a US\$29 million credit approved in September 2008. This project will finance priority investments in transmission and support a program for reducing losses.

What are the challenges facing the electricity supply network in Honduras?

One of the main challenges facing the electricity supply network in Honduras is its high dependency on imported fossil fuels, particularly oil. Most electricity generation is derived from thermal power plants that rely on expensive imported fuel.

What type of power system does Honduras use?

With an installed generation capacity of 1,568 MW (2007), Honduras relies on a thermal-based power system (accounting for nearly two-thirds of its total installed capacity), which is very vulnerable to high and volatile international oil prices. [full citation needed] The generation mix is as follows:

What type of power plugs are used in Honduras?

In Honduras the residential power plugs and sockets are of type A and B. The standard voltage is 120 V and the standard frequency is 60 Hz. In Honduras, there is great potential in untapped indigenous renewable energy resources. Due to the likely long-term trend of high oil prices, such resources could be developed at competitive prices.

What is the least expensive solution to the energy crisis in Honduras?

(Productive uses). SHS are comparatively cheap but energy service is limited and business and service systems are critical and often have high transaction costs. The World Bank concludes that the least expensive solution to reach the goal of the Honduras Government of 400,000 new connections by 2015 would be the dissemination of SHS.
