Hong Kong's energy and transition finance policies can be aligned with national objectives. This leads to Chapter 5, where we discuss Hong Kong's potential role in facilitating energy transition finance. We present a case study of CLP's transition bond and emphasise the need for a clear transition finance taxonomy in Hong Kong.

There is also a huge opportunity for Hong Kong to play a role in green energy markets related to the supply of green energy. These Clean Energy Supply Chain workshops are a vital example of the continued industry collaboration that is required to achieve the maritime industry's goals of accelerating the decarbonization transition, while ...

The "Hong Kong Energy End-use Data" (HKEEUD) has been published over 20 years since 1998, during which the global economic development led to continued growth in energy demand. The HKEEUD covers energy consumption data of different fuel types and specifies purposes for which they are consumed, e.g.
