

METASPACEX, a leading energy sector company, has announced a strategic partnership with Chongqing Bihe New Energy Technology Co., Ltd. (Chongqing Bihe) to enter the hydrogen ...

Green Hydrogen, Energy Storage & Solar: The Future of Energy Is Collaborative and Digital We need to discuss the importance of collaboration, innovation, and digitalization in driving a ...

So-called liquid organic hydrogen carriers (LOHCs) offer a solution to the storage and transport problem. But inserting and extracting hydrogen into LOHCs requires catalysts that are often ...

Last week, Malawi's energy minister visited a battery energy storage system (BESS) project in Kilokari, Delhi. The project, South Asia's largest, will soon power 12,000 low-income homes. ...

Selecting the right hydrogen storage method involves a careful consideration of various factors, including application requirements, infrastructure availability, cost, and safety. Compressed ...

The project envisages development through a network of underwater wells connected to a floating production, storage, and offloading unit situated 150 kilometres (93 miles) from Suriname's coastline. Detailed engineering studies ...

This paper proposes a two-layer, multi-step optimal sizing framework for electric-hydrogen energy storage to address multi-scale energy storage requirements. The first step, the optimal sizing ...

Tenaris has been awarded contracts to supply casing, tubing, line pipe, and related services for Suriname's GranMorgu offshore development. The project will leverage Tenaris's Rig Direct&#174; ...

The new liquid contains up to 6.9% hydrogen by weight, surpassing the hydrogen storage goals set by the U.S. Department of Energy for 2025. This discovery marks the beginning of a new ...

Hydrogen storage used to be one of those niche industrial topics only a few insiders really paid attention to. But not anymore. Today, it's becoming a powerhouse in the global clean energy ...

Hydrogen storage plays a crucial role in enabling its large-scale adoption as an energy carrier. This study examines the technical and economic aspects of storing hydrogen in 200-bar ...

The GranMorgu project represents Suriname's first major offshore drilling effort, with first oil targeted for 2028. It aims to achieve a production capacity of 22,000 barrels per day, through a combination of shallow and deepwater wells tied to ...

Petronas Carigali, a subsidiary of Malaysian state-owned oil and gas company Petronas, has held a naming ceremony for a floating storage and offloading vessel (FSO) that will work at its ...

Project's significance The GranMorgu project represents Suriname's first major offshore drilling effort, with first oil targeted for 2028. It aims to achieve a production capacity of 22,000 barrels per day, through a combination of ...

By combining experimental insights with computational advances, carbon-based hydrogen storage platforms are expected to play a pivotal role in the next generation of energy storage ...
