

Will Macedonia re-open a dormant oil pipeline?

The pipeline and refinery have only been used for storage since 2013. The governments of North Macedonia and Greece are discussing re-opening the dormant oil pipeline.

What is the IEA's Energy Roadmap?

The International Energy Agency (IEA) is leading the development of a series of roadmaps for some of the most important energy technologies. Roadmaps achieve consensus on low-carbon energy milestones, priorities for technology development, policy and regulatory frameworks, investment needs and public engagement.

Does Macedonia have a wind farm?

North Macedonia has a 36.8 MW wind farm at Bogdanci and has received EU and KfW financing to expand it. It was the first country in the Western Balkan region to put into operation a sizeable wind facility. Its second wind farm, the 36-MW Bogoslovec, only started operating in mid-2023.

INTERNATIONAL ENERGY AGENCY International The IEA examines the full spectrum of energy issues including oil, gas and coal supply and demand, renewable energy technologies, electricity markets, energy efficiency, access to energy, demand side management and much more. Through its work, the IEA advocates policies that will enhance

The North Macedonia - North Macedonia Free Trade Agreement aims to foster economic and trade relations between the two countries by eliminating tariffs and other trade barriers. The Agreement offers tariff elimination or reduction for most industrial goods across HS Chapters 25 to 97 including, but not limited to:

One of the key goals of this new roadmap is to understand and communicate the value of energy storage to energy system stakeholders. Energy storage technologies are valuable components in most energy systems and could be an important tool in achieving a low-carbon future.

Domestic coal production. Coal is extracted from underground or surface mines and comes in several types or ranks. Higher-ranked types like anthracite ("hard") and bituminous coal have a higher heating value and are used in industries such as steelmaking, while lower-ranked coals like sub-bituminous and lignite ("brown") coal are primarily used for electricity generation.

The North Macedonia - Ukraine Free Trade Agreement aims to foster economic and trade relations between the two countries by eliminating tariffs and other trade barriers. The Agreement offers tariff elimination and reduction for goods including, but not limited to:

Auctions are driving strong deployment of solar PV, onshore wind and battery storage. There are also projects for interconnections and renewables to decarbonise electricity on Greek islands. However, more effort is

needed boost electrification and improve efficiency in transport and buildings. ... Energy Policies of IEA Countries: Greece 2011 ...

While there were no other major energy legislative changes, North Macedonia continues to harmonize its energy sub-regulations with the EU Energy Community's Third Energy Package (TEP). ... A 213-km oil pipeline with a capacity of 2.5 million tons per year connects oil storage facilities at the Greek port of Thessaloniki with local company ...

Africa Energy Outlook 2019 is the IEA's most comprehensive and detailed work to date on energy across the African continent, with a particular emphasis on sub-Saharan Africa. It includes detailed energy profiles of 11 countries that represent three-quarters of the region's gross domestic product and energy demand.

The International Energy Agency (IEA) is leading the development of a series of roadmap for some of the most important energy technologies. Roadmaps achieve consensus on low-carbon energy milestones, priorities for technology development, policy and regulatory frameworks, investment needs and public engagement.

Change (IPCC) and International Energy Agency (IEA) calling for gas consumption to peak in the 2020s. Gas projects currently in development in the 1. The Energy Community, which seeks "to create an integrated pan-European energy market," includes the EU, the six countries of the Western Balkans, and Georgia, Moldova, and Ukraine.

In July 2021 China announced plans to install over 30 GW of energy storage by 2025 (excluding pumped-storage hydropower), a more than three-fold increase on its installed capacity as of 2022. The United States' Inflation Reduction Act, ...

A report by the International Energy Agency. Moldova energy profile - Analysis and key findings. A report by the International Energy Agency. ... Utilisation and Storage; Decarbonisation Enablers; Explore all. Topics ... is situated in Eastern Europe neighbouring the north-eastern Balkans. The country covers 33 844 square kilometres (km²) and ...
