

China's installed solar photovoltaic capacity is estimated to account for nearly half of the total solar capacity installed worldwide. India continues to advance steadily toward its target of 500 ...

China's Solar Energy Capacity Set to Double by 2030, Driven by PV Tech and Policy Push China is set to nearly double its solar energy capacity, reaching 2,500 GW by 2030--up from 1,230 GW in 2025--according to a new ...

India's solar sector is gaining global traction, with the Dutch-German consultancy Sinovoltaics' 2025 supply chain map projecting the country's module manufacturing capacity to exceed 120 ...

Following the crackdown on Chinese solar PV imports, US manufacturers have now turned their attention to exporters from India, Laos, and Indonesia. They have filed a fresh antidumping ...

India awarded 5.4 GW of co-located solar plus battery energy storage systems (BESS) and 2.2 GW of standalone BESS to developers in the first half of 2025. This marks the nation's highest BESS allocation to date, ...

A fresh US antidumping investigation targets solar imports from India, Indonesia, and Laos, potentially disrupting India's \$4.4B export market. Analysts warn of near-term headwinds for ...

India's solar manufacturing sector has seen significant growth, driven by rising module production capacity, according to the July 2025 edition of the Solar Supply Chain Map released by Hong ...

The latest India Solar Supply Chain Map (2025) report by international quality inspection agency Sinovoltaics reveals that India's photovoltaic module capacity has reached 68.4 GW, cell capacity 24.56 GW, and ingot capacity 14 GW, ...

From pv magazine India Reliance Industries is set to commission its solar cell manufacturing facility in the next quarter, achieving a significant milestone in its goal of building a fully ...

The International Renewable Energy Agency's latest report finds little change in the global average levelized cost of electricity for utility-scale solar plants year-on-year, while the global ...

The Indian government wants to supply solar PV to its domestic market and the world. But reliance on components from its geopolitical rival makes it a challenging task The Clean Energy Frontier is a series of deeply ...
