

Iris solar Afghanistan

Why should you choose Iris technology's solar component power system?

Additional components can expand the uses of the system. Iris Technology's Solar Component Power Systems have been deployed with great success into tactical situations around the world, including Afghanistan and Iraq.

What is Iris technology?

Iris Technology has delivered over seven thousand remote, self-contained man-portable power systems to the Department of Defense through May 2015. The power module receives power from lightweight, flexible solar panels and/or batteries, fuel cells or commercial and NATO vehicles.

What are the biggest solar projects in Afghanistan?

Solarization of 24 Health Facilities in Bamyan and Badakhshan. Solarization of 80 Health Facilities for Kinderhilfe Afghanistan in Nangarhar, Kunar and Laghman. 340 kW MHP/PV Hydro Solar Hybrid Mini-grid. Kandahar's 15 MW solar power project is currently one of the biggest national projects in Afghanistan.

How much does Iris weigh?

Control and monitor your Iris unit remotely with our easy-to-use mobile app. Weighing just 6kg, Iris is easy to carry and set up anywhere your adventure takes you. Removable and replaceable for long-term use, designed with sustainability in mind. Charge all your devices with no region-specific plugs required - power your gear anywhere in the world.
