

First Solar, Inc. ist auf die Entwicklung, Herstellung und Vermarktung von Photovoltaik-Solarmodulen spezialisiert. Der Nettoumsatz teilt sich wie folgt auf die einzelnen ...

The Japan Wool Textile, doing business as Nikke, is a major textile manufacturer. (Image: The Japan Wool Textile) This month, ENEOS Renewable Energy (ENEOS RE) started supplying power to The Japan Wool Textile ...

Obton acquired its first solar project in Japan in 2021. (Image: Obton) Danish renewables company Obton signed a partnership agreement with Intermediate Capital Group's (ICG) Asia-Pacific Infrastructure team aimed at ...

The agreement paves the way for the incorporation of QD technology into First Solar's thin film bifacial photovoltaic (PV) solar panels. «A turning point for the quantum dot industry with this ...

HEXA Renewables and Marubeni signed a partnership agreement to jointly develop up to 100MW of solar power plants in Japan over two years, the I Squared Capital-backed developer and power producer announced on ...

A partnership between PXP Inc and Tokyo Gas Co is working on developing film-type chalcopyrite solar cells for industrial roofs with low load-bearing capacity. Elsewhere, a coalition of partners ...

In the first half of 2024 over 80% of US solar imports were from Malaysia, Vietnam, Thailand and Cambodia. Chinese investment has spurred clean-industry growth, yet heavy reliance on ...

SINGAPORE: The renewables unit of Portugal's largest utility, EDP, will start building its largest solar power plant in land-scarce Japan this year to sell power directly to a company, a senior executive said.

Japan has made a groundbreaking advancement in solar technology by introducing the world's first titanium solar panel, setting a new standard in photovoltaics. This innovative development ...

How could space-based solar power impact the future of renewable energy? What if the sun never set? Japan's OHISAMA project is exploring that possibility. Thanks to a Low Earth Orbit (LEO) ...

At Expo 2025 Osaka, Japan is showcasing a breakthrough in solar technology -- not inside a pavilion, but on the curved roof of a 250-metre bus terminal. Covered in over 250 ultrathin ...

TOKYO, July 21 -- Japan is heavily investing in a new kind of ultra-thin, flexible solar panel that it hopes will

Japan first solar

help it meet renewable energy goals while challenging China's dominance of the sector. Pliable perovskite panels are ...

Japan's renewable energy landscape is set for a major transformation with the emergence of perovskite solar cells (PSCs) -- an innovation poised to redefine how solar power is harnessed.

What if the sun never set? Japan's OHISAMA project is exploring that possibility. Thanks to a Low Earth Orbit (LEO) satellite, this project aims to capture solar energy 24/7 and beam it to Earth, ...

Japan is the perfect blend of ancient customs and state-of-the-art technology. The country itself is known for its sleek, militaristic styles, valuing cleanliness, and showing respect by removing shoes before entering homes and sacred ...

Yano Research Institute expects the installed solar capacity in Japan to reach just over 6GW in FY2030, the company revealed in the latest edition of its forecast. The market research firm expects the currently ...
