In theory, solid-state batteries pack more energy into each unit of volume than conventional lithium-ion batteries. The race to revolutionize the science of electric vehicles (EVs) is heating up.

Chinese battery manufacturer Farasis Energy has begun pilot production of sulfide-based solid-state batteries. The company plans to deliver the first sample cells, with a capacity of 60 Ah, to strategic partners. Farasis Energy plans to ...

?NEW????????? (International Seminar on All-Solid-State Batteries)???????? ?????????????????????????????

? The comprehensive section of the Japan Solid State Batteries Market report is devoted to market dynamics, including influencing factors, market drivers, challenges, opportunities, and ...

As Toyota races toward mass production of solid-state batteries, it's crucial to explore the factors driving this breakthrough. From patent filing trends to global R& D efforts, let's dive into the insights that reveal how Toyota is ...

The Mercedes-Benz-backed battery manufacturer Farasis Energy plans to complete construction of a pilot production line for sulphide-based solid-state batteries by the end of 2025. This line ...

Japan, which has been striving to develop all-solid-state batteries since 2018, currently has the highest number of related patent applications. In June 2023, Toyota, a Japanese carmaker, set a target for itself to ...

Preview of the "Solid-state / Semi-solid Li-ion Battery Innovation & Patent Review", including sections on commercially relevant patents, benchmarking and identification of product launch risk factors.

Japan's Strategic Role in Next-Gen Battery Development As the global mobility industry races toward electrification, Japan is emerging as a leader in advanced battery technologies. With ...
