

Jersey epower energy

Who is Jersey electricity?

Founded in 1924, Jersey Electricity has grown to become a dynamic power utility providing clean, low-carbon electricity. Learn more about the roles and responsibilities of the Board and our Board Committees Discover more about what we stand for, what we do and the people that run the business.

Will Jersey electricity invest £120m in the 'largest ever' upgrade?

Jersey Electricity (JE) has revealed a plan to invest £120m in the 'largest ever' upgrade to the island's network. The firm said the five-year upgrade would support an 'all-electric future' and ensure every home and business could access affordable and sustainable energy.

Could a solar farm boost Jersey's energy security?

Bosses said the plans for the 2.7 hectare site, meant electricity would be returned to the grid in a process which would 'increase Jersey's energy security'. A solar farm in Jersey could power 17% of the parish's homes if planning is approved, electricity bosses say.

How does Jersey de-carbonise its electricity supply?

These cable links have given us the ability to virtually completely de-carbonise Jersey's electricity supply. The remainder of our electricity comes from the Government-owned Energy from Waste Plant and since 2019 some on-Island solar PV generation.

Does Jersey offer low-carbon electricity?

Whether you want a completely new heating system, to simply change your boiler, or switch to electric transport, our low-carbon electricity offers a clean and efficient solution for your every need. Jersey's move to electric is gathering speed. Join the conversation and learn more about making your own move to electric transport.

Will Jersey's 'island plan' boost energy security?

Bosses said the plans for the 2.7 hectare site, meant electricity would be returned to the grid in a process which would 'increase Jersey's energy security'. The firm said the proposal - which is one of several sites it hopes to build by 2026 - supported the government's Island Plan and energy policy.
