Yongpyeong wind farm. South Korea is a major energy importer, importing nearly all of its oil needs and ranking as the second-largest importer of liquefied natural gas in the world. Electricity generation in the country mainly comes from conventional thermal power, which accounts for more than two thirds of production, and from nuclear power. [1]Energy producers were ...

Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product. It effectively measures how efficiently a country uses energy to produce a given amount of economic output. A lower energy intensity means it needs less energy per unit of GDP.

The Danish Energy Agency (DEA) has signed an implementing arrangement with the Korean Energy Agency (KEA) to "strengthen their collaboration" on renewable energy. Denmark and South Korea have been members of the Green Growth Alliance since 2011 and will work together on green, low carbon economic growth through political, technological and ...

The Clean Edge 100 ranks the top publicly traded clean-tech companies in the clean energy, transportation, water, and grid sectors. Eligible companies are members of our global equity research universe and the rankings only include companies that are determined to receive 50% or more of their revenue from clean-tech activities (pure plays).

Bermuda: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
