We provide the best market conditions & high quality services. Fuente Dynamics is already recognized as an active participant in the short term trade in Kosovo, Macedonian Albanian and Montenegrin electricity market and has excellent relations with all regulatory bodies and transmission system operators.

The electricity sector of Kosovo relies on coal-fired power plants (92% as of 2023) [2] and is considered one of the sectors with the greatest potential of development. The inherited issues after the war in Kosovo and the transition period have had an immense effect on the progress of this sector. Regulation of activities in energy sector in Kosovo is a responsibility of the Energy ...

A. Context: Higher Energy Prices Shock Kosovo's Current Account . 1. Energy prices, including of electricity, have increased sharply across Europe, and become more volatile since the start of the war in Ukraine. Russia's energy exports to Europe have decreased quite significantly; for natural gas, Russia's exports

Kosovo: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Kosovo is unable to cooperate as an equal partner at the multilateral level. Although Kosovo has not participated in or signed the UN Framework Convention on Climate Change (UNFCCC), it has the responsibility to respond to the requirements as a signatory of the Energy Community Treaty. The Energy Community Treaty also sets clear reduction targets
