

German startup Tozero has signed a lease to establish a lithium-ion battery recycling pilot plant at the Gendorf Chemical Park in Bavaria, with operations expected to begin later this year.

MASSIMO unveils the MileMax Lithium-ion E-rickshaw Battery, boasting long battery life and zero maintenance. The launch signifies a commitment to sustainable mobility with smart ...

China's industrial regulator plans to launch a major document to guide the production capacity of lithium-ion batteries, which industry experts said will knock out a batch of low-end ...

This type of battery is most commonly utilized for portable electronic devices and EVs. Indonesia has extensive nickel and cobalt reserves, both primary raw materials for Lithium-ion batteries. Indonesia's large deposits of ...

The world of electric vehicles (EV) is in a constant state of evolution, driven by relentless innovation in battery technology. For years, lithium-ion batteries have been the undisputed champions, powering everything from smartphones to ...

This study presents the development of both core and expanded correlations for predicting heat generation in 18,650 lithium-ion batteries under various conditions, offering ...

The global lithium-ion battery polyolefin separator market is experiencing robust growth, driven by the escalating demand for electric vehicles (EVs) and energy storage systems (ESS). The ...

It will keep improving liquid lithium-ion batteries to "maintain advantages globally", while intensifying research and development of all-solid-state batteries, to "prevent disruption" by other countries, they said.

Although carbon-based aerogels with various compositions and functions have been developed and successfully employed to lithium-ion batteries and LSBs, their further development in the ...

As an anode material, it has 10 times the theoretical capacity of the graphite used in today's lithium-ion batteries. It promises smaller, lighter, more powerful batteries--exactly what's ...

Moody's analysts also said that China's competitive advantage in lithium-ion battery cell production gives its carmakers an edge in terms of EV production costs. "China is expected to account for more than half of the ...

# Lithium ion battery development

With the dwindling sources of lithium and geopolitics over lithium sources, the market players are pressurized to look for other power sources such as sodium-ion batteries that work on similar working principles as that of a ...

The demand for lithium-ion batteries is projected to grow significantly, driven by applications in EVs, BESS, and consumer electronics. The market is expected to expand from approximately ...

Aceleron Energy Funding: \$10.6M Aceleron is using new battery technology to create the World's first recyclable, upgradeable and serviceable lithium-ion batteries to drive the global circular economy.

Panasonic unveils its new Kansas EV battery factory, boosting production with 32 GWh capacity plans. D&#252;r and GROB factory concept compares a state-of-the-art process with a next-generation process that ...

Lithium manganese iron phosphate ( $\text{LiMn}_{1-x}\text{Fe}_x\text{PO}_4$ , LMFP) is a promising cathode material for lithium-ion batteries, exhibiting high theoretical energy density, excellent low-temperature ...

The global lithium-ion secondary battery market is experiencing robust growth, driven by the burgeoning demand for electric vehicles (EVs), energy storage systems (ESS), and portable ...

Detailed info and reviews on 19 top Lithium Ion Battery companies and startups in California in 2025. Get the latest updates on their products, jobs, funding, investors, founders ...

The global market for Lithium-ion Batteries (LIBs) Electrolyte Additives is experiencing robust growth, driven by the burgeoning demand for electric vehicles (EVs), energy storage systems ...

The CATMAT project is researching next-generation cathode materials that could significantly increase the energy density of lithium-ion batteries. There is an urgent need to increase the range of electric vehicles ...

Solid-state batteries (SSBs) may offer superior energy density, faster charging kinetics, better safety, and extended lifespan compared to conventional lithium-ion batteries that utilize ...
