The power systems of Lithuania, Latvia and Estonia historically were a part of the Soviet Union "unified energy system". In 1992, when the USSR fell apart, the technical problem of separating the power systems arose. At that time a range of factors (limited options and high reliability of the Soviet network) spoke in favour of keeping the ...

So, reducing energy consumption can inevitably help to reduce emissions. However, some energy consumption is essential to human wellbeing and rising living standards. Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product.

About GEO. GEO is a set of free interactive databases and tools built collaboratively by people like you. GOAL: to promote an understanding, on a global scale, of the dynamics of change in energy systems, quantify emissions and their impacts, and accelerate the transition to carbon-neutral, environmentally benign energy systems while providing affordable energy to all.
