

From microgrids and municipal utilities to solar-powered schools and equitable electrification, these cities are proving that renewable energy is a blueprint for rethinking how power flows, ...

For local authorities, collaborating with community energy organisations can be a powerful way to further climate objectives as well as wider strategic goals. The government's Local Power Plan ...

Energy independence: o Local energy production: As a compact, decentralized energy solution, ETAK enables communities and industries to generate clean energy from local waste. o Fossil ...

Local Energy Markets (LEMs), though pivotal to the energy transition, face growing cybersecurity threats due to their reliance on smart grid communication standards and vulnerable Internet-of ...

A key test for any quasi-local energy in general relativity is that it be nonnegative and satisfy a rigidity property; if it vanishes, the region enclosed is flat. We show that the Hawking energy, ...

Local Energy Efficiency Standards The 2023 WMS addresses both plan-making and decision-taking. On plan-making, it states that "the Government does not expect plan-makers to set local energy efficiency standards for buildings that ...

The UK Government says GB Energy is key to bringing down energy bills and CO 2 emissions. The publicly-owned green power company is a central part of its plan to "make Britain a clean energy superpower". However, ...

Saudi Arabia's Ministry of Energy has launched the "Taqatech Accelerator" program in collaboration with "The Garage" as part of its efforts to drive innovation in the sector, promote economic growth, enhance environmental ...

The LEECP aims to implement energy efficiency and conservation initiatives at the local level as well as accelerate and align energy efficiency and conservation into the green building code and other low-carbon developments ...

ENGIE North America (ENGIE), a global leader in the energy transition, announced today an agreement to acquire a portfolio of 22 net energy metered (NEM) solar energy projects, ...

- DTE Energy sues St. Clair County over stricter solar project rules, challenging Michigan's 2023 preemption law (Public Act 233) designed to fast-track clean energy goals. - The case reflects national tensions between local restrictions ...

## Local energy

Bitcoin mining, long criticized for its energy consumption, may offer a novel solution to optimize electricity grids and monetize surplus energy, particularly in regions with underutilized ...
