OverviewSolar powerWind powerBiomassNational policyBarriersExternal linksRenewable energy in Palestine is a small but significant component of the national energy mix, accounting for 1.4% of energy produced in 2012. Palestine has some of the highest rate of solar water heating in the region, and there are a number of solar power projects. A number of issues confront renewable energy development; a lack of national infrastructure and the limited regulatory frame...

Palestine has one of the highest solar irradiation in the region with an average daily solar irradiation of 5.4-6 kWh/m²/day and more than 3000 h of sunshine per year (Amur & Abdallah, 2021; Ismail et al., 2013a). Until the beginning of 2012, activities related to the exploitation of RE resources in Palestine were limited to solar thermal ...
