

Mali to new energy

Why is Mali building a new solar power plant?

As Mali grapples with an ongoing electricity crisis that hampers economic growth, transitional President Assimi Goïta laid the foundation stone for a new 200 MW photovoltaic solar power plant. The Russian company NovaWind, a subsidiary of Rosatom, is constructing the plant, marking a significant step in the country's energy sector.

Why is Mali launching a 200 MWp solar power plant?

Loading... Mali's President Assimi Goïta has launched a 200 MWp solar power plant project with NovaWind, a Rosatom subsidiary, to address the nation's electricity crisis and promote sustainable energy. The EUR200 million investment aims to supply 10% of Mali's electricity within 12 months.

Which company is constructing a new energy plant in Mali?

The Russian company NovaWind, a subsidiary of Rosatom, is constructing the plant, marking a significant step in the country's energy sector. In recent weeks, Mali's transitional government has intensified efforts to implement this solution nationwide.

Is Mali ready for a green-energy future?

Mali is ripe for the steady transition from its fossil fuels-laden past to a cleaner green-energy future for its socio-economic growth according to its investment plan. Like most West African countries, Mali relies heavily on fossil fuels but has significant potential in solar and wind energy.

Does Mali have a good energy sector?

Mali's positive track record in developing its energy sector, evidenced by its introduction of various renewable energy technologies as well as its efforts to create a welcoming enabling environment, are also discussed in the report.

Will a solar power plant supply 10% of Mali's electricity?

Once operational, the photovoltaic plant will be capable of supplying 10% of Mali's electricity. One day before the start of work on the Sanankoroba solar power plant, the Head of State of Mali, Assimi Goïta, met with the General Director of NovaWind, Grigory Nazarov, to review the progress of the project.

WASHINGTON, June 23, 2023 - The World Bank has approved \$157 million in financing from the International Development Association (IDA)* to help Mali improve the reliability and efficiency of the electricity system, increase access to electricity in selected project areas and facilitate the integration of renewable energy. The Electricity System Reinforcement and Access Expansion ...

Support new investment in renewable energy in northern Mali as an under-implemented component of the Algiers peace agreement. A consistent demand from the non-state signatories to the Algiers agreement is ...
