

Bipolar power supply can effectively reduce line losses and optimize power transmission. This paper proposes a low-power bipolar DC-DC converter with voltage self-balancing, which not ...

Long-duration energy storage (LDES) is best-suited for applications in which power is needed for longer time frames and when renewables or distributed energy resources aren't producing power. And these technologies ...

In parallel, the application of artificial intelligence (AI) and digital twin technologies is transforming the operational management of smart microgrids. AI-based models have shown high accuracy ...

Redwood is expanding into second-life applications for used and unused batteries. The new subsidiary, Redwood Energy, has been founded to tackle the increasing demand for energy ...

ESWA??? Expert Systems with Applications? Step1:?? Guide for authors? Step2:?? ...

Oracle Cloud Infrastructure (OCI) is a hyperscaler which can accommodate AI-enabled and workforce data systems globally. Bloom Energy says it can deliver the on-site power fuel cell ...

With the rapid development of renewable energy, microgrid, as an efficient and flexible energy management system, has gradually been widely used in the world. This study examines the ...
