The Government of Papua New Guinea has set a target of connecting 70% of Papua New Guinea's population to renewable electricity by 2030. By 2050, the Government hopes to have reached universal electricity access throughout the country. UNDP hopes to contribute to this aim through its various initiatives in the country.

Energy literacy represents a foundational process in democratizing energy, particularly in efforts to tackle energy poverty, a term used to describe a lack of access to modern forms of energy. Evidence suggests that energy access on its own is insufficient to lead to sustained, positive, social impacts for those who are currently energy poor.
