

# Mauritania save electrical energy at home

Can Mauritania generate low-cost electricity and hydrogen through electrolysis?

Renewable Energy Opportunities for Mauritania finds that the country could deploy these resources at scale to generate low-cost renewable electricity and hydrogen through electrolysis.

Why should Mauritania invest in wind & solar energy?

Mauritania has high-quality wind and solar resources whose large-scale development could have catalytic effects in supporting the country to deliver universal electricity access to its citizens and achieve its vision for sustainable economic development.

Could renewable generation capacity improve Mauritania's mining operations?

The report's analysis finds that expanding renewable generation capacity in Mauritania could improve the sustainability of mining operations, which currently represent close to a quarter of the country's GDP. These operations are energy-intensive, and mines currently rely predominantly on fossil fuels for their electricity supply.

Could Mauritania's high-quality wind and solar resources be a catalyst for economic growth?

The sustainable development of Mauritania's high-quality wind and solar resources could serve as a catalyst for the country to achieve its vision of strong and inclusive economic growth, according to a new IEA report published today.

Does Mauritania have a pipeline of renewable hydrogen projects?

Mauritania currently has the largest pipeline of renewable hydrogen projects to 2030 in sub-Saharan Africa. However, successfully implementing these projects is conditional on attracting sufficient investment, which in turn depends on reducing risk by securing demand from foreign offtakers.

Can Mauritania export hydrogen?

The report outlines three possible pathways for Mauritania to export renewable hydrogen: shipping hydrogen to global markets in the form of ammonia; coupling existing iron ore mining with renewable hydrogen to produce higher-value direct reduced iron for export; and transporting hydrogen to Europe through a pipeline connecting Mauritania to Spain.

Renewable energy sources: In 2020, solar energy, geothermal energy and wood fuels accounted for approximately 7% of energy usage in the residential sector. Energy usage per household can vary depending on location and climate, the type of home, efficiency of appliances, number of residents in the family, physical characteristics in the house ...

As a responsible individual, you need to take practical actions to save the environment and one way to do so is by reducing electrical energy at home! When finding ways to save energy at home, you must not just be
