

Which port generates most of the electricity in Mayotte?

The port of Longoni generates most of the electricity in Mayotte. The energy sector in Mayotte is mainly oriented towards the consumption of electricity based on fossil fuels; renewable energies are currently underdeveloped for the moment, and there is no export of fossil fuels.

Is Mayotte a good place to get electricity?

Electricity in Mayotte in 2015 was 95% thermal sources and 5% renewable energy. The multi-year energy program sets a target of 30% renewable energies in final consumption in 2020. Electricity needs are growing strongly due to the growth of Mayotte and its population, as well as the increase in electricity.

How many thermal power stations are there in Mayotte?

There are two thermal power stations in Mayotte, consisting of 17 diesel engines in all. The motors are of different powers (between 750kW and 8MW) and use different technologies. This makes it possible to adjust as needed.

Après 840 milles nautiques, beaucoup de soleil, quelques grains de pluie, du courant avec et contre nous, des ciels spectaculaires, des soucis techniques, et un changement de cap : Energy Observer est arrivé ; Mayotte !

L'arxipag de les Mayotte est format per nom des illes, les quals sumen una superfície total de 372 quilmetres quadrats. Per il·lustrar la seva mida es pot pensar en què t'una superfície com el Maresme. El seu nom procedeix del portuguès Mayotta, una transcripció del suahili Maouti, que significa 'illa de la mort' pels perillosos esculls que l'envolten.
