What is the largest component of energy trade between US and Mexico?

Petroleum products are the largest component of energy trade between the United States and Mexico. In 2022, U.S. petroleum product exports to Mexico accounted for nearly 20% of all U.S. petroleum products.

Does Mexico have geothermal energy?

Geothermal energy in Mexico has large potential but is largely unexplored. The Cerro Prieto geothermal field is among the largest geothermal generating stations in the world. A 2021 study found Mexico has approximately 22 TW of green hydrogen potential.

Are Mexico's power plants polluting the environment?

Mexico's older, larger power plants -- including the coal-fired José María Morelos Portillo, Carbon II, and Petacalco and the gas-fired Manzanillo power station - are notoriously heavy polluters associated with numerous environmental, health, and safety concerns.
