I'm building a of grid power system for my home. I currently have (32) 260w sun modules and (32) 215 enphase micro inverters not yet installed bought for a grid tie system. I have a 25kw split phase LF inverter and (3) 100ah 48v LiFePO new batteries expandable to (5). Planning to supply inverter...

Hi, I have an existing AC-coupled off-grid system, using an SMA SI5048 inverter/charger, and SB5000 with 5kW of Solar. I'm currently building a battery-electric locomotive for a miniature railway (another hobby...), and would love to be able to use the batteries in the loco to supplement the off-grid system (think V2G, but on a smaller scale).

The off-grid inverter takes energy from the battery, converts it to AC, and then outputs it. Off-grid inverters are unable to connect to the utility grid. These are meant to be used on their own. Solar or battery power cannot be fed into the utility grid via an off-grid inverter.

What is a Microinverter? A Microinverter or a Solar micro-inverter is an extremely small device used to convert DC to AC. These inverters are so small that they are used as plug-and-play. Microinverters work remotely with every panel. This is advantageous in case of panel failure or power surge. These inverters work on every power output from the panels and if there are ...
