

The application of a virtual synchronous generator (VSG) to provide virtual inertia in isolated microgrids has emerged as a promising control strategy for converter-interfaced renewable ...

This Secretariat is responsible for coordinating all recruitment processes, including advertising job vacancies, receiving applications, conducting screening of applicants, and participating in the ...

It is crucial in a microgrid, especially in defence applications, because poor power quality (e.g., voltage sags, swells, harmonics) can damage sensitive equipment, disrupt operations, and ...

There are a number of control strategies developed for various purposes in uG applications. Hierarchical control is a multilevel approach with central and local controls. The centralized ...

SUA Online Application System 2025/2026: Your Complete Guide to Apply Successfully. Are you interested in pursuing a degree or diploma in agriculture, natural resources, veterinary medicine, or allied sciences? Look no further ...

In the first stage, each microgrid separately optimises its own local scheduling with a combination of renewable and dispatchable energy resources. In the second stage, the energy trading ...

Oracle Cloud Infrastructure (OCI) is a hyperscaler which can accommodate AI-enabled and workforce data systems globally. Bloom Energy says it can deliver the on-site power fuel cell ...

The mobile microgrid energy storage system market is experiencing robust growth, driven by increasing demand for reliable and sustainable off-grid power solutions. Factors such as the ...

The microgrid market is supported by its growing applications in the utility/community segment as microgrids can integrate renewable energy sources, provide grid services, and enhance resilience against grid outages.

Microgrids are introduced with an emphasis on their key features, operational flexibility, and challenges arising from power-electronics-based generation. The mathematical modeling of ...

Long-duration energy storage (LDES) is best-suited for applications in which power is needed for longer time frames and when renewables or distributed energy resources aren't producing power. And these technologies ...
