

Hydropower and wind energy dominate Sweden's renewable mix, while a robust carbon tax--one of the highest worldwide--has pushed businesses to innovate and reduce their carbon output. Cutting-edge city projects, like Stockholm's ...

Greenhouse gas emissions resulting from human activity are causing the world's climate to change in ways that are dangerous to humans and the natural ecosystems we rely on. Strong and urgent action to reduce emissions ...

The International Maritime Organization (IMO) aims to reduce carbon emissions from shipping by at least 50% by 2050. Electric propulsion systems can improve safety and reduce operating ...

Carbon offset programmes aim to lower emissions by allowing high-income countries to meet part of their reduction targets by financing projects in low- and middle-income countries. Evidence from China--one of the world's largest ...

While ten years have passed since the Paris Agreement, global efforts to reduce emissions are still lacking, with recent UN projections indicating that the world is on course for a temperature rise of 3.1°C by 2100 - well ...

EU Member States have put in place 3,000 policies and measures to prevent the worst impacts of climate change. National climate change mitigation strategies, policies and other accompanying measures are also in ...

Mitigating climate change means reducing the flow of heat-trapping greenhouse gases into the atmosphere. This involves cutting greenhouse gases from main sources such as power plants, factories, cars, and farms. Forests, ...

In the face of escalating climate change challenges, achieving carbon neutrality has become a critical goal for governments, businesses, and individuals worldwide. Carbon neutrality means ...

This study investigates the impact of green finance development (GFDI) on carbon emission reduction efficiency (CE_CCR) across 208 cities in China from 2010 to 2022. Our findings ...

Using data from 283 cities and a difference-in-differences model, we find that the BRI significantly reduces urban carbon emissions. These effects vary across regions, with cities ...

EU Commission invests EUR5.6 million in new laser system that creates multifunctional film surfaces

Minsk reduced carbon emissions

inspired by smooth shark skin to reduce drag and ice formation on aeroplanes or ships - ...

Minsk reduced carbon emissions
