

My son solar Greece

What is the largest solar project in Greece?

One of the largest Greek installations is the 400 kWp solar project in Oropos, near the capital city Athens. This ground-mounted photovoltaic project, split into four installations with a power capacity of 100 kWp each, is connected to the national grid generating up to 580,000 kWh per year.

What impedes solar development in Greece?

Currently, probably the main reason that impedes solar development and that makes administrative procedures long and burdensome in Greece, including rooftop solar, is grid availability. In many areas, applications for solar rooftop PV are being rejected due to lack of electricity grid capacity.

Will Greece be a big solar project?

According to the conference, Greece will be the site of larger solar and hybrid projects with a capacity of at least 10 MWp. The Astrasun Group took the opportunity to expand its professional and business relationships at the online conference.

Why should you invest in solar projects in Greece?

The sunshine not only attracts tourists to Greece, but also various members of the solar industry: investors, project developers, distributors from around the world. The Astrasun Group is planning a strong start in the Greek market: the Company is ready to implement 300 MW solar projects in Greece.

So in honor of the Sun, I'll be sharing with you today some stories about the ancient Greek Solar deities, and their sacred plants. But before we get there, I have created a new downloadable solar and lunar calendar to ...

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular. Incentives for renewable energy projects include ...

Qolor™, the new series of photovoltaic panels, combines Invent technology with ultimate design solutions. The aesthetic result is unique, as the glass walls of the Qolor™ unit create something innovative and amazing, with iridescent and three-dimensional effects that suit every type of setting and structure.

My Son 1 and 2 are equipped with advanced, synchronous technology and a team of well-trained staff with high expertise applied during operations. In particular, My Son 1 & 2 solar power plant uses a system of 287,472 solar panels under the JinkoSolar brand, a global leader in the solar energy industry in more than 80 countries worldwide.
