Who is Avicenne energy?

We are a consulting firm specializing in high growth technology markets. Since 1992, we have rapidly established a solid reputation in Energy and Batteries, where we work with the largest players in the industry and organize a world-class conference, "Batteries". AVICENNE Energy is involved as partner, in a large European project: CarE-Service.

How do Nepali citizens meet their energy needs?

Consequently, in the absence of the energy grid reaching remote locations, most Nepali citizens have historically met their energy needs with biomass, human labor, imported kerosene, and/or traditional vertical axis water mills.

Why is Nepal so energy efficient?

With about 1 toe for every \$1,000 of GDP, Nepal has the poorest energy intensity among all south Asian countries. The country has therefore very large energy efficiency potential. Petroleum is the second largest energy fuel in Nepal after firewood and accounts for 11% of primary energy consumption in the country.

Is Nepal able to get 100% electricity in 2024?

The electrification rate in Nepal has notably improved in recent years, with access rising from 93% in 2020/21 to 94% in 2021/22. The government aims to achieve 100% electricity access nationwide by 2024. In the wet season, Nepal exports its surplus hydroelectricity to India through Indian Energy Exchange.

What is the main energy source in Nepal?

Biomass is by far the most important primary energy source in Nepal. Biomass comprises wood, agricultural residues and dung. One major problem with this is that burning these biomass substances for cooking is a common practice (87.3%) and thus exposes those living in the house to harmful air pollutants.

Will China invest in Nepal's energy sector?

Nepal welcomes and looks forward to Chinese investment in its nationally prioritized sectors, particularly in energy, the Nepalese ambassador to China has said.
