Strong energy dependence linked to the metallurgical sector. New Caledonia's energy mix is 97.7% fossil fuel, including 54.1% petroleum products (mainly fuel oil and diesel), 43.6% coal, and 2.3% renewable energies. This high energy dependence is directly linked to the metallurgical industry which consumes 61.2% of the total energy consumption of the territory.

We are mainly active in New Caledonia and Wallis and Futuna through our retail activities. We are also a major player in the renewable electricity generation sector. We lead several community outreach initiatives in these countries.

In 2022, New Caledonia's electricity consumption was heavily reliant on fossil fuels, making up more than 80% of the total energy mix. Coal was the largest contributor within this category, accounting for about half of the total electricity use. On the other hand, low-carbon or clean energy sources played a smaller role, constituting just under 20% of the electricity consumption.

A New Frontier for American Energy. December 4, 2024 . Weekly Columns and Op-Eds. The last several years of energy policies have been detrimental for American energy independence and security. From revoked oil, gas, and mining leases to a destabilized energy market that forced reliance on foreign adversaries, we have been placed in a vulnerable ...

CALEDONIA FURNACE INSTALLATION . Sometimes when a furnace breaks down, the cost of repairing it can be more than installing a new one. This is can be the case when an aging furnace is losing its energy efficiency and breaking down regularly. With a newer more efficient furnace, lower energy bills alone may make it worth the investment.
