

Therefore, this study conducts a comparative life cycle assessment of battery electric vehicles (BEV) in the top 10 electric vehicle-selling developing countries for current (2023) and future ...

The once-accelerating transition to battery electric vehicles (BEVs) in the U.S. has hit a speed bump. Slowing consumer demand, infrastructure limitations, and shifting regulatory signals ...

As Europe's electricity mix is getting cleaner, battery-electric vehicles (BEVs) are also offering a larger climate advantage than previously expected, according to the results of a new study ...

In the first half of the year, more than 5.9 million battery electric vehicles (BEVs) were registered worldwide, a 37% increase compared to the same period in 2024. For comparison, full-year sales in 2024 had only grown by around 14%. China ...

Based on Linglong Tire's 2024 sales figures, consulting firm Frost & Sullivan has named the tyre maker the world's largest supplier of original equipment tyres for New Energy Vehicles (NEVs), ...

Imports of battery electric vehicles (BEVs) fell by more than 50 per cent in value during the 12 months to June 2025, when compared with the year prior, according to Stats NZ. The total value of passenger motor vehicle imports for the past ...

Boost Local EV Manufacturing: Position Maharashtra as India's top producer of battery electric vehicles (BEVs) by incentivizing the establishment of at least one gigafactory for advanced ...

Dominant Segments: Battery Electric Vehicles (BEVs) are leading the passenger EV space, with SUVs and subcompact SUVs dominating sales. Tata Motors remains a frontrunner, driven by ...

Battery Electric Vehicle (BEV) A BEV runs entirely on electricity. Unlike traditional cars, BEVs don't have a gasoline engine; they get all their power from a rechargeable battery. This means ...

Market segmentation reveals a strong preference for Battery Electric Vehicles (BEVs) over Plug-in Hybrid Electric Vehicles (PHEVs) and Fuel Cell Electric Vehicles (FCEVs), with BEVs capturing the largest market share.

Unlike plug-in hybrids, BEVs run exclusively on electricity stored in large-capacity battery packs and emit zero tailpipe emissions, helping countries move closer to net-zero goals. Automakers ...

The project consortium, coordinated by an Austrian Research Institute, is looking for a company (SME or

bigger) acting as Original Equipment Manufacturer, who can cover all vehicle-related ...

Guidance for car manufacturers on how to apply for their vehicles to be eligible for the Electric Car Grant. The guidance explains: how the scheme works vehicle eligibility the application process ...

Battery Electric Vehicles (BEVs) now dominate powertrain installations, making up nearly 71% of the total demand across major regions. Battery packs account for about 38% of the market ...

Registrations of vehicles with plugs rose strongly as battery electric vehicles (BEVs) jumped 39.1% to 47,354 units, equivalent to a quarter (24.8%) of the market, and plug-in hybrid electric vehicles (PHEVs) grew 28.8% to 21,382 ...

According to the SMMT, 24.8% of new cars registered in the UK in June 2025 were pure battery-electric vehicles (BEVs) whilst just 5.6% were diesels. Plug-in hybrids accounted for 11.2%.

Fuel cell vehicles (FCVs), which convert hydrogen into electricity via an electrochemical reaction, offer several benefits compared to internal combustion engine (ICE) vehicles and battery ...

"The good news is a hydrogen vehicle is an electric vehicle," says Guldner. "It's just a different way of storing the energy versus a battery, which also means that we can reuse a lot of the ...

Hydrogen vs. Batteries: Is the Future of Cars Fuel Cells or Charging? The automotive industry is in a whirlwind of change, with electric vehicles (EVs) taking center stage. But while battery ...

This paper explores the implementation of battery electric vehicles (BEVs) in underground mining operations, focusing on their benefits, challenges, and safety considerations. The study ...

The research is clear: In major markets that make up 70% of global new passenger car sales, today's battery electric vehicles (BEVs) are associated with far fewer greenhouse gas (GHG) emissions than internal combustion engine ...

A new report by the International Council on Clean Transportation (ICCT) finds that battery electric vehicles (BEVs) produce significantly fewer greenhouse gas (GHG) emissions than ...
