

Niger energy gate

Where can I find information about energy in Niger?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Niger on the IEA homepage. Find relevant information for Niger on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

How can Niger improve energy access?

Broadening energy access is a central national development objective in Niger. At present, less than 25% of the population enjoys access to electricity, and the picture in rural areas is bleaker, at less than 5% electricity access. Generation of electricity through renewables has long been viewed as an important way to close this gap.

How is energy used in Niger?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Is energy access a critical barrier to development in Niger?

Energy access in Niger remains a critical barrier to the country's development. Modest improvements have been experienced in recent years. However, electricity access in Niger remains low at about 24% and almost all the population relies on the unsustainable use of traditional biomass (MP/AT-DC, 2011).

Does Niger need electricity?

Access to electricity remains a challenge in Niger and the country is reliant on electricity imports for a significant share of its supply. The country is an oil resource centre and it is one of the ten-largest uranium resource-holders in the world.

Why is access to energy a problem in Niger?

Despite this rich potential, access to energy is still a challenge for the authorities. Final energy consumption in Niger is estimated at 0.15 toe per capita, one of the lowest in the world. The weakness of this value is mainly due to limited access of Niger's households to modern energy.

Thus, "Uranium Gate" is just another story in Africa where a government, in this instance Niger, is suspected of corruption for receiving bribes in exchange for mining contracts favourable to foreign companies. ... 2011, involving the Soci t  du Patrimoine des mines du Niger (Sopamin), Optima Energy, a Lebanese subsidiary of a group based ...
