The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.

OverviewHistoryMoixa Smart BatteryGridShare SoftwarePrevious productsAwardsMoixa is a British cleantech company that develops software and hardware to optimise use of renewable energy. They produce smart batteries that are paired with residential solar panels. The company also designs "GridShare" Software which optimises battery systems, and can also be used to create virtual power plants (VPP) with other batteries, as in the work they do in Japan with ITOCH...
