In March 2024, PPUC acquired energy from Palau's first commercial Independent Power Producer (IPP), a solar company. This allowed them to replace two diesel generators with solar power. While a positive step towards renewable energy goals, the IPP system currently lacks battery storage, limiting its ability to maximise excess energy.

Owning a solar system provides the greatest long-term financial and operational benefits. While the upfront costs can be significant, incentives like the federal Investment Tax Credit (ITC) and accelerated depreciation (MACRS) reduce the initial financial burden. Over time, ownership delivers greater returns as businesses eliminate reliance on utilities and avoid rising tariffs.
