

Does Palau have a renewable power system?

The results of the optimisation show that Palau's current power system is dominated by diesel generation, with renewable energy only taking a small share (just 4%). With more deployment, however, the share taken by renewables could potentially increase to more than 92%. This corresponds to the lowest average system LCOE.

Does Palau have solar power?

Together with a large amount of diesel generation, Palau also has some installed solar PV capacity. Indeed, the country's current renewable energy capacity includes a total of 2.5 MW of utility-scale solar PV systems (see Table 3).

What is Palau Energy Act?

Revision of previous policy?: The Act No. 9-54 of 2016 establishing Palau Energy Administration Regulatory Authority (Palau Energy Act) aims to amend Title 37 of the Palau National Code to establish an Energy Administration and provide regulatory framework for the energy sector, and for the related purposes.

How will Palau achieve 100% eV stock by 2035?

By 2035, the wind capacity identified in the optimal system scenario (9 MW) could also be installed. By 2040, the government of Palau could add electrolysis and reach 100% EV stock, having reached 100% of new registrations in the early 2030s and gradually replaced old ICE vehicles with EVs.

The Smart Energy Code Company (SECCo) is able to reimburse reasonable travel, accommodation and subsistence expenses. To make an expense claim, please complete the Sub-Committee Members Expense Form found here and send this to SECASFinance@gemserv and Louise Evans (louise.evans@gemserv). Please ...
