Are solar panels transforming the solar energy sector in Russia?

The solar energy sector in Russia is witnessing a significant transformation, marking a pivotal shift towards renewable energy sources. Amidst this change, solar panels have emerged as a cornerstone for solar power generation, fostering a dynamic environment for manufacturers and supply chain centers across the country.

Why should solar companies attend the Russia solar energy fair?

The Russia Solar Energy Fair is another critical event for solar companies looking to expand their footprint in the Russian market. This fair brings together key players from across the solar supply chain, from solar panel manufacturers in China to local distributors and installers.

Is solar energy a good investment in Russia?

Even though demand for solar energy in Russia is low, the Moscow-based company, Hevel, is producing solar modules with an energy conversion efficiency of 22 percent, which is the world's highest. In addition to Hevel, only two other companies in the world produce solar equipment with similar efficiency: Panasonic (Japan), and Sun Power (U.S.).

When will the solar PV market grow in Russia?

We will send a sample as soon as possible. The Photovoltaic (Solar PV) Market in Russia is expected to grow in the period 2021 - 2030. Government plans of Russia include the development of the solar PV sector.

What is Russia's largest solar energy company?

With a capacity of 20 MW, it will power about 4,000 homes and will be launched in September. The Hevel Group ("hevel" means "sun" in the Chuvash language) is Russia's largest solar energy company, and was founded in 2009 by Renova and Rosnano, which have a 51-percent and 49-percent stake, respectively.

How much solar energy does Russia produce?

Russia's share of solar energy production is a paltry 0.03 percent of the country's total, and to meet its electricity needs the country relies heavily on traditional energy sources with high conversion efficiency, such as gas, oil, hydro and nuclear. Nevertheless, in the past three years Russia has been rapidly developing solar energy.
