Battery Options: In general, two battery chemistries are suitable for battery backup installations in residential homes. The most common is a Lead Acid AGM battery. AGM is maintenance free, does not need ventilation and has a long floating life. The higher cost, yet modern chemistry is the Lithium-Ion battery.

The BaseCharge 1500 offers 1521 watt-hours of shareable energy at your fingertips. From medical devices to refrigerators, this high-capacity power station can handle energy-hungry devices and an array of electrical requirements. Integrates with BioLite solar panels for a full solar generator solution and utilizes Maxim

Car batteries are terrible for back-up power in the home. They are designed to generate high amperage for a few seconds-- that's what you want in order to crank the starter motor. Unlike lithium batteries, car batteries are not designed to be drained down and recharged... which is what you want for any sort of back-up power.
