More ranchers every year make the switch to solar for their wells. We know why. We used to haul water and climb windmills too and it sucks. 94% of ranchers that switched to an RPS Solar Pump this year said they won't ever go back to paying an electric bill, repairing windmills, running a generator or hauling water. Lifetime Value that blows the others out of the water.

Hi, I have a 11.5kW grid-tied solar system using a SMA Sunny Boy 6.0 and 3.8 US-41 inverter both with the secure power supply (SPS). I have started looking into adding Lithium Iron Phosphate batteries to the system as both a backup power during outages and to be used at night or other times the panels are not receiving solar energy to help reduce the power ...

This is where an MPPT comes in. An MPPT is essentially an auto-adjusting DC-to-DC converter that aims to run the PV module at the optimum power level (36V in our example), and then down-converting the voltage (swapping volts for amps like a transformer does), and then charging the 12V battery at the full 200W, or  $200/14.7 = 13.6$  ampere.

RPS Solar Pump Kits are for people that believe in getting the job done themselves, and getting it done right. Our goal is to arm you with the equipment and knowledge to take control of your water and save a fistful of money doing it. RPS Solar Pump Systems include a great deal of additional parts and components standar
