

Power hub energy Kenya

What is Kenya's energy sector like?

The sector presents opportunities for trade and investment, especially in renewable sources like geothermal, solar, and wind. Around a third of Kenya's installed capacity is owned and operated by IPPs across several plants, including small-scale hydro plants, geothermal, biomass, wind, solar, and heavy fuel oil plants.

What is Kenya's wind power potential?

Kenya is estimated to have a wind power potential of 3,000MW. The Lake Turkana Wind Power Plant is the single largest wind power generation plant in Africa supplying 310MW to the grid. Additionally, GE Energy is the technology supplier for the 100MW in Kipeto wind power plant, a DFC-funded project that was commissioned in late 2021.
