

Power solar station Cuba

Can Cuba build a solar power plant?

The loan should partly help finance four 10 MW solar power plants. Beyond that, the Cuban government has a long way to go if it is to build the planned 700 MW of solar capacity and secure the \$3.5 billion that are necessary to fund its vision of a countrywide energy transformation.

What is the solar energy potential in Cuba?

Solar energy potential in Cuba is high when considering that the country's geographic position can enable a generation of 5kWh per square meter - about the average daily usage of one household. Although solar energy projects have thus far been limited to remote areas, capacity has increased considerably in recent years.

Where are the solar panels made in Cuba?

The solar panels used in the project are partly produced by the Cuban Electronic Industry -70 percent of all the solar panels were assembled in Pinar del Rio, and 100 percent were installed by the Copextel company ran by the Ministry of Computer Science and Communications (MIC).

How much solar energy will Cuba have by 2030?

The Cuban government has stated that it wants to have 700 MW of solar energy capacity installed by 2030. Cuba can rely on local expertise to help support the growth of solar energy around the country.

How many off-grid solar systems are there in Cuba?

By the end of 2014, over 1,500 off-grid solar systems were powering clinics, schools, community centers, and homes located in remote areas of Granma Province. The Cuban government has stated that it wants to have 700 MW of solar energy capacity installed by 2030.

How will solar energy impact Cuba's energy demand and production?

For solar energy to have a long-term impact on Cuba's energy demand and production, projects must expand beyond off-grid usage. The focus should shift toward urban applications of solar systems and the further development of solar-powered domestic appliances.

Last year, the Abu Dhabi Fund for Development (ADFD) offered a AED-55-million (USD 14.9m/EUR 13.3m) concessionary loan to the government of Cuba for the development of a 10-MW solar project in the country.

Even with the installation of thousands of solar panels and the use of renewable energies, Cuba is still dependent on oil to generate electricity. (OnCuba News) 14ymedio, Havana, 23 August 2023 -- China will donate 9,259 solar panels to BioCubaFarma for the installation of a plant at the National Center for Scientific Research of Cuba, in Havana.

Power solar station Cuba
