Uzbekistan is amongst the fastest growing economies in the Central Asian region, with an increasing demand for energy. By 2018, the country's power consumption reached 50 million TWh, and the domestic demand for power has been projected to rise at an annual rate of 4%, due to continued population growth and industrial expansion.

This is in line with the Digitize to Decarbonize-Power Transmission Grid Enhancement Project. The Asian Development Bank (ADB) will provide a \$125m loan to Uzbekistan to support the Central Asian nation's in improving its power transmission grid, energy efficiency, and deploying more renewable energy.
