Will Puerto Rico's solar energy projects boost energy security?

By Timothy Gardner WASHINGTON (Reuters) - The U.S. Energy Department said on Thursday it is offering a conditional loan guarantee of up to \$861 million for two utility-scale solar-energy projects in Puerto Rico that are expected to boost energy security after recent hurricanes severely damaged the U.S. territory's grid.

What is NextGen Solar?

NextGen Solar is a U.S.-based, renewable energy company focused on building and operating utility-scale, PV Solar power plants in sub-Saharan Africa. They integrate a hybrid model of modern PV generation with existing legacy diesel plants. NextGen Solar has operations in Tanzania, Kenya, and Uganda.

Where will solar panels be built in Puerto Rico?

The projects will be built in the coastal communities of Salinas and Guayama in south Puerto Rico. The projects comprise 200 megawatts of photovoltaic solar panels and up to 285 MW of stand-alone battery energy storage capacity. The solar arrays will power about 43,000 homes, it said.

Does Puerto Rico have a solar energy Resilience Fund?

Besides financing aid, the Energy Department also has a \$1-billion Puerto Rico Energy Resilience Fund that President Joe Biden signed into law in late 2022 to supply rooftop solar panels to the territory.

How much money does Puerto Rico have to pay for solar?

Up to \$190 million is available to Puerto Rico's Housing Administration and a private company to pay for solar and battery installations in public housing common areas and subsidized, multifamily housing properties. Another \$175 million is available for certain healthcare and dialysis centers.

Why did Puerto Rico get a power outage?

The announcement comes as the U.S. territory continues to struggle with chronic power outages that have worsened since Hurricane Maria pummeled the island as a powerful Category 4 storm in 2017, razing the electric grid. The outages also are blamed on a lack of maintenance and investment in its electric grid for decades.

The Oriana solar facility is the largest operational PV farm in Puerto Rico, responsible for approximately 30% of the island's solar generating capacity. Since operations began at the park in 2016, Oriana has greatly expanded Puerto Rico's clean energy path, producing 92,000 MWh annually and powering nearly 10,000 homes on the island.
