The heart of a PV system is the solar cell. The incident sunlight, i.e. electromagnetic radiation, on the solar cell initiates a physical response whereby the solar cells generate a direct current. In general, a solar module is made up of 60 or 72 solar cells that are electrically connected and safely protected by a tough glass panel and frame.

Hanwha Group acquired Germany's Q CELLS GmbH in 2012 along with its solar cell factory located in Cyberjaya near Kuala Lumpur. The factory has since been used by Hanwha Q CELLS as its production center. At the time of the acquisition, the factory was limited to producing 800 MW of solar power cells.
