

Bulgarian-German renewable energy development and construction company SUNOTEC has acquired a project in Latvia that combines 400 MWp of solar capacity with 600 MWh battery ...

Alongside hydroelectric power, Latvia also utilizes other renewable sources like wind and solar energy, though to a lesser extent. The country's diverse energy mix is indicative of its commitment to reducing carbon ...

To address pressing challenges such as climate change, environmental degradation and energy security, the global transition to renewable energy has become essential. This study presented ...

US Defense Secretary Pete Hegseth on Friday welcomed his Estonian, Latvian, and Lithuanian counterparts at the Pentagon to discuss defense cooperation. "The United States remains fully ...

Located in Tukums municipality southwest of Riga, Pienava will be Latvia's largest wind complex to date and is expected to produce up to 475 GWh of renewable electricity annually once ...

Role of renewable energy Renewable energy is increasingly prominent in Europe's energy landscape. Countries are investing in wind farms, solar panels, and hydroelectric plants to reduce carbon emissions and combat ...

The new rules aim to accelerate the deployment of renewable energy in all sectors of the economy, not only in the power sector, but also and especially in those sectors where progress is more difficult like heating and cooling, ...

Provisional Central Statistical Bureau (CSB) data published on 2 July show that electricity generation from solar power grew 2.2 times year-on-year, reaching 536 GWh in ...

July 22, 2025 [Biofuels International]- Avia Solutions Group, a leading provider of aircraft leasing services, has announced plans to develop the largest and most advanced sustainable aviation ...

Energy modernization projects in nine member states of the European Union will receive a total of EUR 3.66 billion from the Modernisation Fund, in the largest disbursement to date from the ...

Hydropower, wind power and solar power plants generated a total of 4 022 GWh of electricity in 2024 - 6.5 percentage points (282 GWh) fewer than in 2023. The volume generated from wind ...

European renewable energy provider SUNOTEC has finalized the acquisition of SIA DSE Lazas Solar's solar

Renewable electricity latvia

and energy storage project in Latvia from Danish Sun Energy. This transaction ...

The energy transition is moving forward, but the deployment of renewables still faces regulatory and permitting hurdles. New European, national, and regional projects and policies seek to ...

Renewable energy communities (RECs) are increasingly recognized as pivotal instruments in the global energy transition, offering decentralized, participatory, and sustainable solutions for ...

the European Commission has issued reasoned opinions to Portugal, Latvia, and Ireland for their failure to fully implement the directive aimed at simplifying and accelerating renewable energy ...
