

U.N. Secretary General António Guterres on Tuesday called on tech companies to power the build out of data centers with 100% renewable energy by 2030, even as the industry turns to gas and coal ...

The future workforce will likely need a mix of fossil fuel expertise and renewable energy knowledge. By proactively adapting to industry changes, oil and gas professionals can position themselves as leaders in the next phase of global ...

Sustainable energy emphasizes energy sources that fulfill current needs, reduce environmental harm, and set up future generations for success, unlike green and renewable energy which prioritize only the current ...

The solid line with arrows illustrates the bidirectional relationship between renewable energy production, exploitation, and utilization and climate change, including impacts on resource scarcity, environmental pollution, ...

SLSEA - Sri Lanka Sustainable Energy Authority As the governing body responsible for pioneering the sustainable energy revolution in Sri Lanka, we aim to facilitate the development of our nation's rich energy resources, ...

In a scenario where the world achieves the targets set at COP28 of tripling renewable energy capacity and doubling energy efficiency by 2030, the global share of renewable energy would ...

As we move toward a sustainable future, solar energy and the future of our planet are more intertwined than ever. By 2025 and beyond, solar futures will play a primary role in transitioning toward a clean, renewable, and energy ...

China's renewable energy capacity is projected to double by 2030, reaching over 3,000 gigawatts, a significant expansion that underscores the nation's accelerating shift toward clean energy ...

Renewable energy is essential for addressing climate change and securing a sustainable future. Experts say Australia could be powered entirely by renewable energy as soon as 2030, thanks ...

The future of renewable energy lies in building a robust, dynamic local currency financing ecosystem - one that is inclusive, transparent, and tailored to the realities of both developers ...

Renewable energy, usable energy derived from replenishable sources such as the Sun (solar energy), wind (wind power), rivers (hydroelectric power), hot springs (geothermal energy), tides (tidal power), and biomass ...

# Renewable energy and the future

A prior version of the bill didn't just phase out the tax credits; it also placed a brand-new excise tax on clean-energy projects--one that even renewable energy opponents bristled at.

As the region bears the brunt of climate change, initiatives like the Renewable Energy Cabin Retrofit Program aren't just about installing solar panels; they're about advancing energy sovereignty, fostering economic empowerment, and ...

The renewable industry did prevail on Senate Republicans like John Curtis of Utah and Lisa Murkowski of Alaska to make a few last-minute changes. A contentious tax on future wind and ...

Energy's recent lawsuit against St. Clair County, Michigan, over solar regulations offers a microcosm of the broader tensions between local control and state-level clean energy ...

Reliance Infrastructure: Anil Ambani's Reliance Group is pivoting towards defence, power, and clean energy for future growth, emphasizing innovation. This strategic shift follows ...

The budget bill the U.S. Senate passed on Tuesday and the House of Representatives is now debating for final approval would dampen development of wind and solar power, kill climate ...
