solar and storage microgrids in the US. Located in Ravenswood, West Virginia, the project aims to supply Titanium Metals (TIMET), a subsidiary of Precision Castparts, with renewable energy for the manufacturing of titanium products for the ...

The Solar Panel Recycling Market report provides a detailed evaluation of the industry by highlighting information on different aspects which include drivers, restraints, growth opportunities, and threats. This information can help stakeholders to make appropriate decisions before investing. It also provides a detailed analysis of global market size, regional and country-level ...

Global energy technology company Enphase Energy has launched an AI-powered DIY permitting feature on Solargraf, its cloud-based platform.. Aimed at US solar installers, the feature is designed to automate the complex solar and battery permitting process, potentially reducing the time to produce full permit plans by up to 95%.

In Solar energy, it is used as a solar panel, collectors and solar mirrors. Sisecam is a pioneering organization in the flat glass market. It conducts the activities in four main areas including architectural glass, automotive and transportation-related glass products, energy glass, and home appliance glass.

TotalEnergies has started commercial operations of Danish Fields and Cottonwood, two utility-scale solar farms with integrated battery storage in south-east Texas, US. Danish Fields is TotalEnergies" largest solar ...

Solar panels absorb sunlight as a source of energy to generate electricity and Efficient Solar Panels own the highest efficient ability. In the context of China-US trade war and g

ENGIE North America and Meta have finalised an environmental attributes purchase agreement (EAPA), under which ENGIE will provide 260MW of renewable energy from its Sybert Branch solar project. The solar facility is located near Austin, Texas, and close to Meta"s data centre in Temple.

France-based oil and gas company TotalEnergies has expanded its renewable energy portfolio in the US by acquiring solar project developer Core Solar. Based in Austin, Texas, Core Solar has a 4GW portfolio that includes utility-scale solar and energy storage projects currently in various stages of development.

Leeward Renewable Energy (LRE) has announced the completion and commencement of commercial operations at its White Wing Ranch solar project in Yuma County, Arizona, US. The 179MW project is a significant addition to LRE"s portfolio, now exceeding 3.3GW of operating capacity.

The Three Springs solar PV power plant, with an estimated development cost of A\$440m, is projected to have a 25-year operational life, potentially maintaining 90% capacity post that period. The plant could also be decommissioned, returning the land to its original state.
