

Romania bess program

Does Romania have a Bess system?

At this point, Romania's installed BESS capacity is negligible. The largest system now under construction is a 7 MW lithium-ion battery owned by Megalodan Storage in Ilfov county, near Bucharest. Presently, the only operational projects in the country are two BESS systems operated by Portugal's EDPR, with a total capacity of around 1.5 MWh.

When will Romania implement a Bess subsidy scheme?

All projects must be implemented by the end of 2025. The subsidy scheme will contribute to Romania's energy transition objectives by developing at least 240 MW/480 MWh. At this point, Romania's installed BESS capacity is negligible.

How big would a Bess project be in Romania?

The project would be many times larger than the largest BESS online in Romania today, a 6MW/24MWh system from developer and independent power producer (IPP) Monsson (Premium access article).

How will a Bess subsidy help Romania's energy transition objectives?

The subsidy scheme will contribute to Romania's energy transition objectives by developing at least 240 MW/480 MWh. At this point, Romania's installed BESS capacity is negligible. The largest system now under construction is a 7 MW lithium-ion battery owned by Megalodan Storage in Ilfov county, near Bucharest.

How much money will Romania provide for battery energy storage systems?

The Ministry of Energy of Romania will provide just over EUR103 million in financial support for battery energy storage system (BESS) deployments in the country. Minister of Energy Virgil Popescu signed an order approving the state aid scheme for investments in battery energy storage systems on Monday, 28 November, announced via his Facebook page.

What is Romania's energy storage requirement?

Minister of Energy Sebastian Burduja reportedly declared at a conference that Romania's storage requirement is 4,000MWh, and that half would be covered by BESS and half by pumped hydro energy storage (PHES) technology.

The government of Romania will distribute EUR 103.5 million (USD 109.3m) to back the deployment of commercial and industrial (C& I) battery energy storage systems (BESS) that should go online by 2025.

Romanian market Enache said that Romania needs to deploy around 2.5GWh of BESS to accommodate its renewables pipeline, that this was "very easy to implement by 2030," and that the Romanian energy environment is "in a good place to accommodate such investments." Monsson also has a separate 6MW
