ProShares has launched ProShares S& P Global Core Battery Metals ETF (ION), which they describe as the first ETF to invest only in companies mining battery metals. These companies supply the raw metals needed to power the batteries used in the growing number of electric vehicles, laptops, smartphones and energy storage devices.

This ETF structure also serves as an avenue for investors who were previously restricted from directly investing in alternative assets. Bitcoin ETFs are anticipated to address concerns related to self-storage risks, potential cyberattacks or fraud, and legal uncertainties, instilling a sense of security and augmenting their attractiveness.

Index providers, Solactive, writes that the electric vehicle market witnessed remarkable growth last year, exceeding 10 million in sales.
