

# Sierra Leone checklist for solar power plant

Where is the 50MW Planet Solar PV project located in Sierra Leone?

The 50MW Planet Solar PV project is split in four different locations in Sierra Leone, consisting of a 12MW power plant under construction in BO/Kenema, a 4.05 MW (DC) power plant to be constructed in Port Loko, a 25MW power plant under construction in Makoth and a 10MW power plant under construction in Kono.

Does Sierra Leone have a solar energy resource?

Ministry of Finance The Government of Sierra Leone (GoSL) recognises that the country is endowed with a significant solar energy resource. This potential however remains largely untapped.

How many solar mini-grid sites are there in Sierra Leone?

In 2020 Power Leone signed an MOU with the Government of Sierra Leone to construct and operate 40 solar mini-grid sites with 1.4 MW capacity across rural Sierra Leone. In 2024, Sierra Leone is constructing and commissioning 17 of these mini-grid sites (800 kW).

Do Sierra Leone laws apply to a project financed infrastructure project?

In most cases the Government insists on applying Sierra Leone laws exclusively to the entire IPP project, but because Sierra Leone's laws are not sufficiently developed to deal with the complexities of project financed infrastructure contracts Sierra Leone, investors and especially lenders, insist that the laws of other jurisdictions be applied.

Who regulates the energy sector in Sierra Leone?

The primary law regulating energy sector in Sierra Leone is the National Electricity Act 2011 ("Electricity Act"). This Act incorporates EGTC and establishes EDSA, both of which started operations in 2015. It also sets the legal provisions under which those entities are governed, managed, functioning and are funded.

Does Sierra Leone have duty-free & GST exemptions for solar PV equipment?

Despite these duty-free and GST exemptions for the solar PV equipment in Sierra Leone, the process of its application is reported to take quite long and more stream-lining and clear procedures of collaboration between the institutions is needed.

Three Development Finance Institutions and a renewable fund manager have announced a co-investment of more than \$52 million for Planet Solar, a greenfield 50MW solar power project in Sierra Leone. Planet Solar will be the first large-scale grid-connected solar Independent Power Producer (IPP) project, driving a diversified approach to ...

The funding of \$40 million for the project is likely to be an encouraging sign for many other renewable energy projects under development in Sierra Leone. One example is the project of Solar Era Holdings, a subsidiary ...

# Sierra Leone checklist for solar power plant

In a letter dated July 14, 2021, United States International Development Finance Corporation (DFC) committed to provide \$217 million in debt financing for a new 83 megawatt power plant in Freetown. The Western ...

In Sierra Leone, the first solar power plant developed by an independent power producer (IPP) is entering its operational phase. The Baoma 1 solar photovoltaic park is located in Yamandu, near the town of Bo. The 5 MWp solar plant will add 5% to Sierra Leone's total electricity generation capacity. Currently, the West African country has less ...

The funding of \$40 million for the project is likely to be an encouraging sign for many other renewable energy projects under development in Sierra Leone. One example is the project of Solar Era Holdings, a subsidiary of Africa Growth Energy Solutions, which would like to build a 25 MW solar thermal power plant near Bo in the south of the country.

"Sierra Leone's first SOLAR POWER PLANT commences commercial operations" By Daniel Kargbo "The first solar photovoltaic power plant in Sierra Leone developed... | 10 comments on LinkedIn

By Faridat Salifu In a landmark development on the sidelines of the 28th United Nations Conference of the Parties on Climate Change (COP28) in Dubai, a coalition of international investment entities has unveiled a groundbreaking \$52 million financing initiative to establish four solar photovoltaic power plants in Sierra Leone. This monumental endeavor ...

ECA - Gap analysis of legal & regulatory framework for solar IPPs iii Executive Summary This report is prepared at the request of the Government of Sierra Leone as part of the World-Bank-funded project on Unlocking the Potential for Grid-Connected Solar Power through Private Sector Investment Sierra Leone. This report provides the gap analysis ...

Makeni Biomass Power Plant is a 15MW biopower project. It is located in Northern Province, Sierra Leone. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active. It has been developed in a single phase. Post completion of construction, the project got commissioned in 2014.

In a letter dated July 14, 2021, United States International Development Finance Corporation (DFC) committed to provide \$217 million in debt financing for a new 83 megawatt power plant in Freetown. The Western Area Power Generation Project (WAPGP), sponsored by Milele Energy and TCQ Power Limited, will generate and sell electricity to the Electricity ...

Sierra Leone is taking significant steps to improve its low electricity access rate by committing to various renewable energy projects. These initiatives, driven by the country's Presidential Initiative on Climate

Change, ...

Sierra Leone Lungi Solar PV Park is a 13MW solar PV power project. It is planned in Northern Province, Sierra Leone. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the announced stage. It will be developed in a single phase.

power generation fleet in Sierra Leone within the short term. Considering the characteristics of the interconnected system in Sierra Leone, and that this assessment is focused on the short term (no storage available, constrained transmission ... MWp solar PV power plant) based on the model's outputs. The dispatch analysis took

Construction of the 6MWp Freetown Solar Park solar PV plant was completed in April, project consultant Karim Nasser told African Energy. Nasser said Covid-19-related restrictions caused work to stop from March to November 2020, delaying the plant's completion, but it has now been handed over to the government, which launched a tender for operation ...

Since 2005, Sierra Leone's firstever power plant, Bumbuna Dam, has produced more than half of the nation's total electricity. In 2023, a partnership between Bitgreen, Sewa Energy Resources (SERL) and GEAPP, sees a step towards a more sustainable future for renewable energy in Sierra Leone, thanks to the Betmai Hydroelectric Facility.

We also look forward to working on Sierra Leone's transition to renewable energy sources like solar and wind power," he said. United States Ambassador to Sierra Leone - David Reimer said: "This plant will increase Sierra Leone's generation capacity significantly. ... The United States signs \$217 million agreement to build new ...

In 2020 Power Leone signed an MOU with the Government of Sierra Leone to construct and operate 40 solar mini-grid sites with 1.4 MW capacity across rural Sierra Leone. In 2024, Sierra Leone is constructing and commissioning 17 of ...

Read also: Agreement signed for Sierra Leone's US\$ 1.5bn Freetown-Lungi airport bridge. Read also: Guinea inaugurates Coyah-Sierra Leone border road project. Phase one of the Sierra Leone's 126-MW Power Generation Project. Phase one of the project will generate 83.5 MW with two GE LM2500 turbines in combined cycle with a steam turbine.

The Abu Dhabi Fund for Development announced a new loan program that would provide Sierra Leone with Dh 33 million, or about \$8.9 million, to construct a new solar power plant near Freetown, the capital and a major urban area. Called Solar Park Freetown, the project would provide an extra six megawatts to Sierra Leone's already burgeoning solar ...
