

As the backbone of modern energy systems, smart grids and digital substations promise efficiency and sustainability--but they also open the door to escalating cyberthreats. This article dives ...

From enhancing cybersecurity to optimizing complex logistical operations, the impact of quantum computing powered by antimatter could revolutionize multiple industries and drive unprecedented progress in scientific discovery.

General Motors has signed a non-binding memorandum of understanding with Redwood Materials meant to accelerate deployment of energy storage systems using both new U.S. ...

Advancements in Energy Storage Technologies: Improvements in battery technology, including higher energy density, longer lifespan, and reduced costs, are making energy storage a more ...

The Role of Lithium Battery Energy Storage in Telecom Power disruptions can have devastating effects on telecom infrastructure, causing service interruptions, data loss, and operational inefficiencies. Lithium battery ...

On July 23, Desay Battery, a leading global provider of comprehensive energy storage solutions, held its mass production launch event in Changsha, China. The event showcased a new ...

This study explores the application of deep learning techniques, specifically Long Short-Term Memory (LSTM) networks, to detect anomalies in solar power production within a smart grid ...

Decentralized structures and rapidly advancing digitization are creating new entry points for cyber criminals. As the BSI confirms, they are using various attack vectors: supply chain attacks ...

Inconsistent cybersecurity practices in organisations pose a threat to the energy sector. A new handbook from the University of Vaasa offers a structured, user-friendly resource to enhance ...

Google invests in Energy Dome's CO2 battery technology for long-duration energy storage, a strategic move towards powering all its global operations with carbon-free energy by 2030.

Even as Southeast Asia positions itself as a rising hub for renewable energy and electrification, one of its own companies -- Leoch Battery -- is aiming to strengthen its regional footprint after achieving significant success across the ...
